These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Bamboo Crumble Exfoliator is a 100% natural exfoliating powder sourced from Bambusa arundinacea stems and obtained through an upcycling process. Its particle size ranges from 100 to 1000 microns, allowing for a **progressive, self-adjusting exfoliation**: it begins with effective removal of dead cells and impurities, then naturally breaks down into an ultra-fine powder with a **mattifying finish**.

This unique transformation enables a **customized exfoliating experience**—adapting in intensity and texture based on application.
