

COCONUT EXFOLIATOR

INCI: *Cocos Nucifera shell powder*

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Coconut Exfoliator is derived from the crushed shells of coconuts. After the membranous fibers are removed, the hard shell is ground into a fine powder, offering excellent exfoliating properties while being gentle on the skin, ideal for stimulating epidermal renewal.

Coconuts, native to the tropical regions and a symbol of the tropics, are harvested throughout the year in the warm, sunny climate of Ben Tre province, Vietnam.

The fruit is first used by the food industry (for juice, oil, etc.), and then the shells are upcycled into cosmetic exfoliants.
