

# GARNET EXFOLIATOR

INCI: Garnet powder

## EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

## PROPERTIES

Garnet Exfoliator crafted from garnet stones, known for their presence in metamorphic and igneous rocks. Garnet's stable crystal lattice structure, rich in aluminum (25%), silica (35%), and iron (30%), gives it its powerful abrasive, toning, and revitalizing properties.

The exfoliant is produced by crushing garnet stones, then sifting them to create particles of varying grain sizes. These exfoliating particles offer excellent abrasiveness and stability, though they can be challenging to keep in suspension. Ideal for formulations that require a robust, natural exfoliant with mineral-rich benefits.

GENTLE EXFOLIANTS  
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

## APPLICATIONS

Stable in all formulations, including aqueous formulations.  
Difficult to maintain in suspension.

## TECHNICAL DATA

APPEARANCE	POWDER
COLOUR	BROWN / PINK
FRAGRANCE	LIGHT
AQUEOUS GEL STABILITY	KEEPS ABRASIVENESS AND COLOUR
NATURALITY INDEX	1
