

LUFFA BLUE EXFOLIATOR

INCI: *Luffa Cylindrica* fruit powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Luffa Natural Exfoliator is a natural exfoliant made from Luffa fibers, which are carefully dyed: a process that enhances the stability of the exfoliating particles while maintaining their natural effectiveness.

Luffa, a genus of tropical and subtropical vines in the cucumber family, is known for producing fibrous fruits that, when fully ripened, become the loofah sponge commonly used for scrubbing. In addition to their exfoliating properties, luffa fibers are prized for their ability to stimulate blood circulation and gently yet effectively exfoliate the skin. The sponge-like texture, with fibers aligned in various directions, ensures a thorough and invigorating scrub.
