

OLIVE EXFOLIATOR

INCI: *Olea Europaea* seed powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Olive Exfoliator is crafted from olive stones, part of the shells and kernels range.

The olive tree, native to the Mediterranean Basin, is cultivated globally, from South America to Australia. Its fruit, the olive, is central to Mediterranean agriculture and cuisine, primarily valued for olive oil production.

The olive tree, synonymous with life and hope, is revered as an eternal symbol. Beyond its oil, the olive provides a hidden treasure: its kernel, which, when finely ground, creates a gentle yet effective exfoliant that leaves the skin soft and glowing.
