AQUALGAE ASCOPHYLLUM

INCI: *Ascophyllum nodosum* extract, *Potassium sorbate*, *Sodium benzoate*, *Citric acid*

AQUALGAE RANGE

Aqualgae is a natural, organic seaweed water sourced from algae harvested on the Brittany coast. It is obtained through a gentle evaporation process that recovers 100% of the water from the algae, making it a sustainable and eco-friendly alternative to pure water in cosmetic formulations. Certified 99.6% natural and 99.1% organic by ECOCERT, it supports local marine resources and circular economies. Aqualgae enhances the natural content of cosmetics, offering benefits for both consumers and the environment by upcycling a previously discarded by-product.

PROPERTIES

AQUALGAE Ascophyllum comes from *Ascophyllum nodosum*, a brown algae recognized for its powerful slimming and well-ageing properties.

This algae, also sourced from the Atlantic Ocean, is particularly effective in firming and toning the skin, making it a key ingredient in formulations aimed at improving skin elasticity and reducing the signs of ageing.

AQUALGAE PALMARIA

INCI: *Palmaria palmata* extract, Potassium sorbate, Sodium benzoate, Citric acid

AQUALGAE RANGE

Aqualgae is a natural, organic seaweed water sourced from algae harvested on the Brittany coast. It is obtained through a gentle evaporation process that recovers 100% of the water from the algae, making it a sustainable and eco-friendly alternative to pure water in cosmetic formulations. Certified 99.6% natural and 99.1% organic by ECOCERT, it supports local marine resources and circular economies. Aqualgae enhances the natural content of cosmetics, offering benefits for both consumers and the environment by upcycling a previously discarded by-product.

PROPERTIES

AQUALGAE Palmaria is extracted from *Palmaria palmata*, a red algae known for its rejuvenating and draining effects.

Harvested from the North Atlantic Ocean or the North Sea, this biological water is ideal for slimming and toning cosmetic products. It supports skin vitality and helps in formulating products that enhance body contouring and skin firmness.

AQUALGAE SACCHARINA

INCI: *Saccharina latissima* extract, *Potassium sorbate*, *Sodium benzoate*, *Citric acid*

AQUALGAE RANGE

Aqualgae is a natural, organic seaweed water sourced from algae harvested on the Brittany coast. It is obtained through a gentle evaporation process that recovers 100% of the water from the algae, making it a sustainable and eco-friendly alternative to pure water in cosmetic formulations. Certified 99.6% natural and 99.1% organic by ECOCERT, it supports local marine resources and circular economies. Aqualgae enhances the natural content of cosmetics, offering benefits for both consumers and the environment by upcycling a previously discarded by-product.

PROPERTIES

AQUALGAE Saccharina is obtained from *Saccharina latissima*, a brown algae known for its purifying properties.

This biological water is perfect for protecting the skin against external aggressions such as pollution and UV radiation. *Saccharina* helps in formulating products that cleanse, purify, and shield the skin, making it an ideal choice for urban skincare.

AQUALGAE UNDARIA

INCI: *Undaria pinnatifida* extract, *Potassium sorbate*, *Sodium benzoate*, *Citric acid*

AQUALGAE RANGE

Aqualgae is a natural, organic seaweed water sourced from algae harvested on the Brittany coast. It is obtained through a gentle evaporation process that recovers 100% of the water from the algae, making it a sustainable and eco-friendly alternative to pure water in cosmetic formulations. Certified 99.6% natural and 99.1% organic by ECOCERT, it supports local marine resources and circular economies. Aqualgae enhances the natural content of cosmetics, offering benefits for both consumers and the environment by upcycling a previously discarded by-product.

PROPERTIES

AQUALGAE Undaria is derived from *Undaria pinnatifida*, also known as Wakame, a brown algae sourced from the Atlantic Ocean.

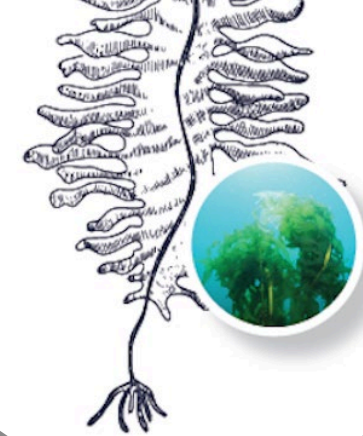

This biological water is rich in antioxidants and oligoelements, making it particularly beneficial for sensitive and mature skin. Its anti-aging properties help in formulating effective skincare products aimed at rejuvenation and protection against environmental aggressors.
